

## Slade 3300CJK Pump Packing

### Applications

Chemical, steam, hydrocarbons, pulp and paper, and more (refer to Industries Served)

### About the 3300CJK Graphite Packing

Carbon jacketed graphite & Kevlar® packing used as an anti-extrusion or bull ring in high pressure applications, also as an anti-abrasion bottom ring in slurry applications. Graphite foil yarns, each yarn individually reinforced with carbon fiber, are braided and jacketed with carbon and Kevlar® fibers. Recommended up to 500°F/260°C.
