WIRE FEEDING MACHINE

MAIN FEATURES

- Designed with 2, 4 or 6 strands (1 or 2 or 3 wired simultaneously)
- Two drive wheels for each strand which guarantee a very good feed of the wire (one for pulling and one for pushing)
- Wire diameter from 5 to 20 mm
- Wire speed from 5 to 400 m/min
- Electronic wire detection system
- Full automatic control

WIRE FEEDING MACHINES WITH GUIDING SYSTEM

CEBA provides all the required accessories such as:

- Coil supports
- Guide pipes with guiding rolls
- Final feeding tube (telescopic, tilting, etc)
- Cutting device
